

CREATE EVENT*

Event creators can record a new accomplishment, contact or event using this create event Menu. In the events, Results & Accomplishments: New Information Form page users can describe their event details and based on the details provided event reports are generated.

**For purposes of this explanation "EVENT" is a term used to describe any action, contact, accomplishment or event that a recorder documents in T/MC OHATS*

To expand your understanding of OHATS TMC and the recorder goals, read this 2002 overview:

[http://www.tutormentorexchange.net/OHATS/Reports/TMC OHATS Report Sep-00 thru Mar-02.pdf](http://www.tutormentorexchange.net/OHATS/Reports/TMC%20OHATS%20Report%20Sep-00%20thru%20Mar-02.pdf)

Recorder Name Select Add New <i>Recorder ALWAYS AN Actor by default because Documenting Something You do</i>	Recorder name can be chosen from the list of existing names or a new recorder can be added through the "Add New" link
Private Item ☐	If you check this box, events will not be listed to public. It is available for the logged users only
Event Occured Date: Calendar	Specify the Date on which the event took place, or began
Date Unsure Calendar	If you are not sure when the event happened then choose an approximate date for when the event took place
Source ☐ External ☒ Internal	Specify the source of the Event. By default the event source will be set as "Internal" All internal and external events will be listed separately in the Main page. Define difference - Ganesh
State Alabama	Choose a state in which an event or action took place, or where the primary contact is located. E.G. if you had a meeting with someone from New York City, choose New York, from the list of states where the event is scheduled to happen. Need to be able to choose countries, too.
Sponsor	Sponsor is not needed. Can you change this box to COUNTRY? Give the name of the Sponsor who sponsors the event
Location	Not needed. The box on State and Country would cover location. Specify the Location where Event is scheduled to take place

This event: ☒ Occured in only one day ☐ Will occur multiple days but has an end date. Please List the future date if you know in Item Description ☐ It is not designed to end	Options for capturing event period 1. "Occurred in only one day" if the events occurs on only one day. 2. Choose "Multiple days but has an end date" option if the event is scheduled to occur on more than one day but has a scheduled end date. 3. Choose "It is not designed to end" if the event is a never ending event.
Item Novelty --Select-- --Select-- Modified from Earlier work New - Not done before Pre Existing Other	Item Novelty tells about the item innovation. The item can be a new item or an existing one or may be a modified from the earlier work. Choose one of the options to specify about the nature of your Item.
Item Type --Select-- --Select-- Blog Discussion Group or List Communication Email Communication Event other than Meeting Meeting by Phone Meeting in Person Personal Reflection Other	This section describes contacts, which may or may not lead to accomplishments or events in the future. You do not need to document every contact, but if you have a purpose for contacting someone, you can show the nature of that contact here. Choose an item type from the list of item types. Note: this feature was not in the 2000-2007 version of OHATS TMC.
Item Description	Give a description about your item. Briefly outline what happened so that people outside your organization can understand the nature of your accomplishment, contact or event.
Item Meaning	Give the Meaning for your item. I.e. Describe why and how this event is important to the mission, objectives or work of the organization. Look at the choices in the EVENT GOALS section. All actions should related to one or more event goals, or a new goal should be stated.
Did I delete a box here?	ITEM RESULT: State the outcome or predict future results or consequences as a result of the recorded event. NUMBER OF PEOPLE INVOLVED Can you create a new box that allows us to put in the number of people in a meeting, or event? When I document a conference, for instance, I can't list all 200 people who attended. If I can reference a list, and put a number. Then that would help show the scope of the event or meeting.

Key Organization Selected Organization vatt systems	Ganesh. This should come after Key Actors. In this section you are listing the organizations involved in the event you are describing. By default when an actor is chosen the actor's organization will be loaded. If you have worked with this actor or organization previously, you will be able to pull it from the list of organizations already on-line.
Key Actors Name Address Available Actor RanganathaPerumal > >> < << Selected Actors NamasivayamSridhar This can become time consuming as the list grows	List the key person(s) involved in the event you are describing. If you have listed a person previously, the name will be in the "Key Actors Name" list. You can choose an actor of your choice or add an actor through the "Add New" link.

EVENT GOALS

The OHATS T/MC is intended to document actions that lead to a desired long-term outcome. The major categories within the Tutor/Mentor Connection mission and action plan are the event goals listed below. As you describe an event, think of the impact of your action on one or more of these goals. An Event Recorder can choose any of these goals or state their own goals other than the listed goals. More than one goal can be chosen for an event.

Read more of mission and goals:

http://cmappublic.ihmc.us/servlet/SBReadResourceServlet?rid=1180119458133_1125501099_34173&partName=actualhtmltext

Event Goals ☐ Public Awareness	Check this check box if the item relates to public awareness i.e. related to media(TV, Radio, print, cable, web)
☐ Technology	Check this check box if the event goal is related to the organization's use of technology to achieve goals.
☐ Research	Check this check box if the event goal is related to research, best practices, program locator search, and/ or evaluation
☐ Training	Check this check box if the event goal is related to training, education, and/or helping people understand and use the information T/MC collects and shares
☐ ResourceDevelopment	Check this check box if the event goal is related to Resource Development and Capacity Building, eg. namely bringing in/developing people and organization helping tutor/mentor programs throughout Chicago get volunteers, dollars, training, and other resources needed to mentor kids to careers.
☐ StrategicEvents	Check this check box if the event goal is related to one or more of the events, services or products the T/MC has created, such as conferences, recruitment fairs, etc.
Other	If the event goal is other than the specified list of goals stated the event goals in the above, describe your goal in this other text box.

EVENT TYPE – MEASURE OF COMMUNITY CHANGE

A Community Change is an observable change in the environment that indicates a new or modified program, policy or practice of an organization or system. A reported item is counted as a community change if it is facilitated by the organization under study (Tutor/Mentor Connection), is important to the mission of that organization, and influences or engages people or organizations outside of that organization. (read more at <http://www.tutormentorexchange.net/OHATS/Reports/TMC> OHATS Report Sep-00 thru Mar-02.pdf)

Once you describe what part of the T/MC mission your event affects, select the box of one or more of the following categories that best describes this event. You can check more categories. If you select more than one category, rate the relative priority, on a scale of 1-10. 1 being the lowest and 10 being the highest. By default the rank will be stored as 10. Thus if you check "media" and "community system change" which was more important in your opinion. If equal in importance, give each a "5". Steve, Ganesh, this is extremely subjective to interpretation. Do we want this?

Event Type ☐ Community System Change	Priority 10	Check this check box if the event resulted in a creation or modification of any community or system.
☐ Media	10	Check this check box if the event resulted in media related to your organization.
☐ CommunityAction	10	Check this check box if the event resulted in Community action or change
☐ Resources	10	Check this check box if the event resulted in funding, materials and services to your organization.
☐ Services	10	Check this check box if the event resulted in offering or providing a service by your organization to a person, client, or group
☐ PlanningAndDevelopment	10	Check this check box if the event result was an event or action to plan or develop your organization or its related work
☐ CriticalEvent	10	Check this check box if the event result was an event or action that positively or negatively influenced your organization or its work.
Other 		If your event type is other than the specified event types specify it in the "Other" text box area.

EVENT COMMUNICATION

In this section you can help organize the information you document for future reports and analysis. You can choose a communication type from the list or specify your own communication type. You can choose more than one communication type.
 Ganesh. Does this affect what gets put on the metrics charts?

☐ Report	Check this check box if the event has to be included in organizational reports or related document.

I Like

CAN other search fields be added? - Yes

Company Name & Job title need to Allow more space for long Names

Sort Based on first NAME So LAST NAME

☐ Recorder	Check this check box if you want the user to be added as a “recorder”
Title Mr.	By default the “Title” will be set as “Mr.”
First Name Last Name	You need to specify first name, last name, Office phone number and office e-mail id to create an user account.
Office Phone	You need to give only 10 digits for the phone number

SEARCH

In the search page by default all records will be displayed. You can choose single search criteria or combinations of search criteria.

Item Type All Records	Choose an item type and click search to see the events corresponding to the chosen item type.
Event Type All Records	Choose an Event type and click search to see the events corresponding to the chosen event type.
Recorder All Records	Choose a Recorder name and click search to see the events corresponding to the chosen Recorder name
Date From	Choose Event occurred Date and click search to see the events corresponding to the Date
State All Records	Choose a state where the event is scheduled to occur and click search to see the events corresponding to the State
Actor All Records	Choose an actor name and click search to see the events corresponding to the chosen actor name
Rank ALL	Choose a rank and click search to see the events corresponding to the Rank.
Location All Records	Choose a Location where event is scheduled to occur and click search to see the events corresponding to the Location.
Sponsor All Records	Choose a sponsor name and click search to see the events corresponding to the chosen sponsor.
Export To Excel Word	The grid can be exported to either Excel or word. Do the search operation and click on excel or word to import the contents

NO

NO

NO

NO

☒ Special	Check this check box if the event is a special event.
☐ BestPractice	Check this check box if it is a best practice.
☐ Email	Check this check box if the you want to share this event through mail.
☐ News	Check this check box if the event can be shared through news or through media
Email List 	You can specify the list of e-mails separated by comma with whom you want to share.
Other Comment 	Other comments related to event communication can be given here.

UPDATE EVENT

- Event details, Results and Accomplishments can be updated using the edit icon in the Event home page or from the Search page.
- While updating the event details we can add a new recorder name, change the existing recorder name, add a new actor to the event or change the actor.
- We can change the item novelty, and Change the Item type.
- Event type, Event goal and Event communication can also be changed.

(will we be able to go back to the data we are transferring from the 2000-2007 OHATS and update that information?)

METHODS

Measurement Framework and Process

Specific prompts on an OHATS web data entry form guide reporters to describe specific kinds of information for the following purposes:

1. To identify specific T/MC staff and stakeholders that become reporters
2. To identify information about the event or action so that someone, even if unfamiliar with T/MC, can understand what happened and why it was important.
3. To identify common elements across the reported events or actions so that they can be grouped for quantitative analyses and searched for specific information.

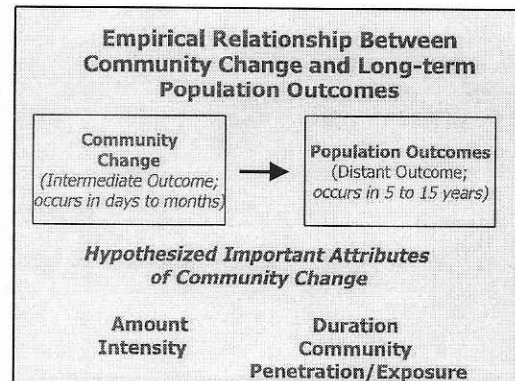

The data entry form in Appendix 1 shows the information collected.

The common elements mentioned in number 3 allow one to search and analyze the OHATS database for events and actions by:

- Date, time period and intended duration
- New or different versus pre-existing events and actions
- People and organizations involved in bring about the events or actions
- T/MC strategy areas
- Internal (e.g., hiring staff, planning activities) and external organizational (e.g., networking, and providing services) events and actions
- Ways to share the event (e.g., by email, newsletter or the press)

OHATS measures are based on research and experience with nonprofit organizations seeking to improve long-term, community-wide outcomes in public health and community development. A core component of OHATS is based on research of a documentation system created in the early 1990s at the University of Kansas for the U.S. Centers for Disease Control community initiatives to prevent cardiovascular disease. That system enabled the study of how multiple organizations collaborate in a given community to create change in order to reduce the prevalence of illness and disease many years later. That research showed that organizational staff and stakeholders could systematically document their contributions to community-wide, longer-term outcomes and also identified important measures and methods for tracking the progress of ongoing collaborative initiatives. (Please contact us for additional references to this research.)

One important measure used in OHATS was adopted from this original research. This is the measure of "community change." A community change is an observable change in the environment that indicates a new or modified program, policy or practice of an organization or system. A reported item is counted as a community change if it is facilitated by the organization under study (i.e., T/MC), is important to the mission of that organization, and influences or engages people or organizations outside of that organization. Examples include the start of new tutor/mentor programs, adjusting the hours of tutor/mentor programs and businesses to make it easier for adult volunteers and youth to participate in programs, or adopting time-off policies that encourage employee volunteerism. Preliminary studies and current research are testing the hypothesis that longer-term, community-level outcomes (e.g., crime rates, high school graduation rates) are likely related to specific attributes of community change. These attributes include (a) the amount of change (e.g., new or modified community and systems changes within a specific period of time, goal, and/or geographic area), (b) the duration of a change (e.g., ongoing changes may be more influential than one-time events), (c) the penetration or exposure to relevant populations (e.g., more people exposed to a change may increase the influence of that change; people may be exposed through multiple sectors, and/or settings (e.g., schools, businesses, and faith, and communities), or geographic areas, and (d) the intensity of strategy (e.g., a change that modifies access and removes barriers to services may be more powerful than a change to provide information about services).
