Hi Dan,

I have a phone and electricity (209-723-4398), but our long distance service is not up yet. I still can't believe we are actually in our own home.

You can also fax me the Fry materials you mentioned at 347-710-7483. Please email me to tell me you faxed them so I can look for them.

I'll call Dimitra once I see the questions and then resend the budget or other materials they need.

I checked the T/MC OHATS database. All the data is there, all the way through June (including a test record I just did). For some reason it does not show in the report. I'll try to fix this tomorrow. You can still enter your information with no problem.

My Earthlink/Mindspring connection will not go over 28 kbp here and DSL is not available in my area yet (I'm less than a mile away from where it is available). The phone guy and I are getting a petition to extend the service to our area.

Give me a call or I'll call you as soon as my long distance is connected.

Hope all is well,
Steve
