Data Analysis & Visualization Project Planning

Identify your tools of choice to create an initial set of visualizations for your project. Feel free to use [Large Language Models to Design DVL-Framework Aligned Data Visualizations](https://drive.google.com/file/d/1g0wtX9DzpChDktyQfuAS9QVA14fQ5mNP/view?usp=drive_link)  (https://drive.google.com/file/d/1g0wtX9DzpChDktyQfuAS9QVA14fQ5mNP/view?usp=drive_link). Describe your workflow in the draft client project report. Identify at least two approaches to visualize your data that can address your research questions and user insight needs. Make sure each visualization has a legend and a description.

Submission Requirements

1. Update the Draft Client Project Report

Revise the existing write-up, making changes from any comments you've received from your User and Tasks Analysis submission and discussion you've had with your group.

Update the report to provide:

1. Simple statistics of the datasets used (e.g., number of records, entities, and major attributes, etc.)
2. Describe the data analysis visualization methods you have applied. Share the initial analysis and visualization results.
3. Discuss key insights gained from your initial data analysis and visualizations.

Share supporting material to your Google Drive Folder that supports your report, like visualization images, workbooks, presentation slides, etc.

2. Submit the link to your team's Google Drive Folder on Canvas.

3. Update the class in your team's work in your group's discussion thread.

Share your initial work and link to all your results from that week so that others can comment. You will update this discussion thread each week with updates on your team's progress.

4. Presentation

Teams will present their Project Plans via a 5-minute presentation. Ideally, the presentation is in-person; but teams of online students can present via zoom. Presentations will take place in Luddy room 1106. Please aim to attend all presentations to provide feedback to your classmates and to learn from the challenges and opportunities encountered by other teams.

Make sure your slides cover

1. Official project title, client name, team member names, affiliations, and photos
2. Stakeholder(s) and their needs
3. Statistics of the datasets used
4. Data analysis visualization methods
5. Discussion of key insights gained so far

Update the Client Project slide deck (you must use an Indiana University email address to access and edit the slides): https://docs.google.com/presentation/d/1KEugjwX0TH0KY2i80vYyGWPYB8tsz0AK4qcBg2oSg_A/edit?usp=sharing
