

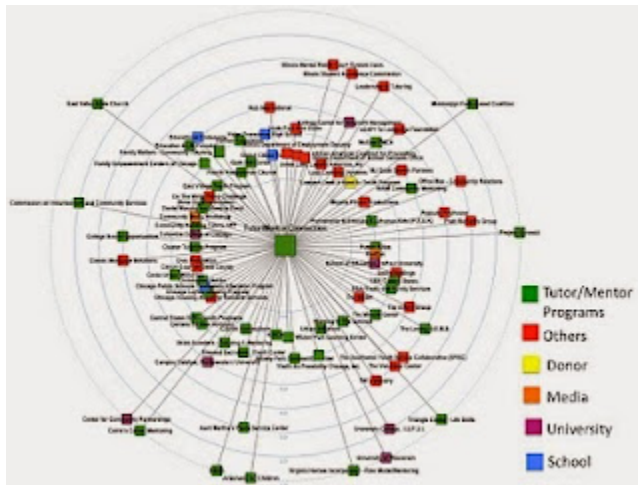

Mapping & Analyzing Participation

Project Sponsor: Daniel F. Bassill

Sponsor email address: tutormentor1@gmail.com

Project Description (goal/scientific or practical value):

I propose having a IVMOOC team build an open source template that anyone could use to collect data about who is participating in their events, and easily create network analysis maps that show this information. This article from my blog shares my thinking about mapping event participation. Creating a template that anyone could use with event registration to capture data in a format that easily converts into network analysis maps, would be a huge service to anyone thinking about doing this work.

[Links to an external site.](#)

Continue from previous work but focus on building an open source template that people can use with event registration to collect data on participants that can be easily loaded into a relationship mapping software, such as Kumu.io or Gephi.

Information on dataset(s) to be used:

I created an Excel spreadsheet showing participation in Tutor/Mentor Leadership and Networking Conferences that I hosted every six months from May 1994 to May 2015. I shared that with the 2015 IVMOOC team and it is available for 2025 teams. I also have publicly available blog articles and concept maps that visualize the purpose of mapping participation and show categories that might be included in a template.

Link to dataset:

This is a link to the Google drive folder with spreadsheets for past conferences. I can share it with team members once they are determined.

Relevant publications, websites, etc.:

This article has links to many publications that show what's possible with relationship mapping. <https://tutormentor.blogspot.com/2025/08/mapping-event-participation.html>

[Links to an external site.](#)

It also has links to 2015 and 2016 IVMOOC work and to concept maps that can be used in building a template to capture data from event participation.

For additional information look at the discussions posted in this Network Analysis group on the Ning site that I have hosted since 2007.

Publication Notes:

I would want to approve results and be given recognition as the source of this idea. A link to the <http://www.tutormentorexchange.net>

[Links to an external site.](#)

website should be included.

Project Sponsor Biography:

I focus on connecting people, ideas, information and resources to solve complex problems, such as helping kids born in high poverty areas move through school and into jobs and careers.

I created the Tutor/Mentor Connection in 1993, and Tutor/Mentor Institute, LLC in 2011, with a goal of helping high-quality tutor/mentor programs reach more youth in all poverty areas of Chicago to help similar programs grow throughout Chicago and in other cities.

Between 1975 and 2011 I helped create three of the most respected tutor/mentor programs in Chicago, as

- Montgomery Ward-Cabrini Green Tutoring Program from 1975-1990. Program grew from 100 to 300 pairs of teens and volunteers over 15 years.
- Led Cabrini-Green Tutoring Program, Inc. from 1990 till October 1992. Number of youth grew to 440 and the number of volunteers grew to 550.
- Led Cabrini Connections from 1993-2011. The program started in 1993 with five teens and 7 volunteers and enrolled more than 600 teens and 800 volunteers in the next 18 years

I'm now connected to many alumni of these programs on social media and seeing them post stories of their own kids finishing high school and college. That's the long-term benefit of such programs.

I helped grow the Lawyers Lend A Hand to Youth Program

(<http://www.lawyerslendahand.org/>

) from a \$2k award in 1994 to a \$2 million foundation in 2007.

With no professional fund raising staff, limited dollars, no board members with connections to City Hall or wealthy families, I raised more than \$6 million between 1993 and 2011 to support operations of Cabrini Connections, Tutor/Mentor Connection.
