Submit Peer Feedback

Your assignment this week is to review the Initial Project Results for two teams, excluding your own, and to comment on each team's 'Write-up #1-#10'.

Note that you need to complete this assignment on your own (this is not a group submission).

Please keep your comments constructive, and make sure they address all five points in the grading rubric:

1. Quality of data selection, cleaning, preparation, and documentation
2. Appropriate selection of tools, algorithms, workflows, and parameter values
3. Quality of data analysis, visualization results, and discussion of insights gained
4. Completeness and quality of validation and redesign
5. Overall quality of content, including the accuracy and completeness of information, the expressiveness and clarity in communication of ideas using text and visualizations, and the appropriateness of references to/attribution(s) for the work of others

This assignment will count towards the participation points for the second half of the course. The six points will be assigned based on:

1. Whether you've made comments for each paper, and
2. The accuracy and quality of the comments evaluated by the assignments rubric (i.e. accuracy of peer evaluations, and quality of grammar and spelling).

We have compiled some ***Example Peer Reviews*** (<https://iu.instructure.com/courses/2389650/files/198166109/download?wrap=1>) from previous years to give some guidance on what we are looking for you on this assignment.

Note: if an assigned paper is not available for review, please wait for the submission until Friday, if the assign team has not submitted their work by that time, please select an additional project that is not your own and distinct from your other reviewed papers.

Submission Requirements

Please submit your two reviews as either a Word document or PDF file. You do not need to submit your reviews on a team's discussion board posts.

Afterwards, we will compile each team's peer reviews and share these submissions with each team so that they can review the feedback from their classmates and address any issues or recommendations. **All reviews will be anonymized before we share reviews with each team.**

For more information or if you have any questions, email mginda@iu.edu & abueckle@iu.edu as soon as possible. (<https://iu.instructure.com/courses/2389650/files/198166109/download?wrap=1>)
