Conversation: Event Tracker

Dan,

I am sorry - I missed your call today. My daughter was not feeling well and I have to take her to emergency.

Our initial goal was to redesign the OHATS entry form. While doing that I have added few features that I thought it would be helpful for your organization.

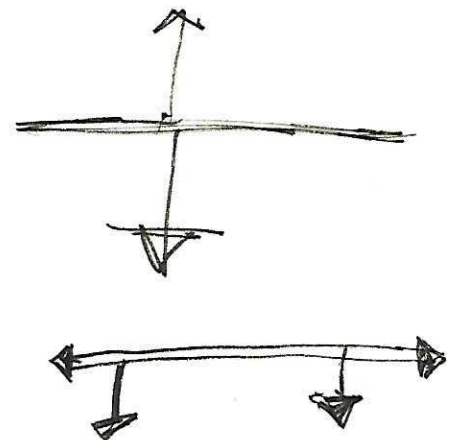

If I am able to fix/do all the things listed (sent earlier), I am thinking the following options are available to me to move forward in the event tracker.

- 1) Non-profit organization like TMC pay \$0/-
Each organization will get their own subdomain
My company will maintain the website.
Income earned thru advertisement will belong to my company. 10% of the donation collected or referred thru our website will be my companies commision.
- 2) Non-Profit Organization will pay \$50 per month.
5% of the Income earned - thru PAID advertisement will be shared with my company.
- 3) TMC will pay \$15k to my company.
We will give all the source codes to TMC.
TMC can maintain the site thru volunteers or for paid money with us or other consulting company like us.

Since it requires lot of effort and availability of resources is also critical to me, I am looking for someway profitable for my company and also to your organization.

Let me know.

Ganesh

ganeshmr@creativebi.com

Dear Ganesh,

I want to thank you and your company for the many hours of work you have donated in 2007 to rebuild the Tutor/Mentor Connection's Organizational History and Tracking System (OHATS T/MC).

Based on the information you provided on October 15, you have done 1,672 hours of work at a total donated cost of \$21,568.

As a small charity that is innovating unique uses of technology in the social sector, we would not have been able to find donors to do this work, and we thank you. I look forward to continuing to work with you and CreativeBI.com in 2008.

Sincerely,

Daniel F. Bassill
President

Steve,

Let's talk about 4pm (2pm your time). Below is the response I sent to Ganesh and below that is the offer he sent to me.

Let's talk about both.

Dan

Subject: Re: Event Tracker

This sounds like a good idea and I agree with it in principle. Please move forward on doing the updates. I have the conference tomorrow and Friday, so let's talk more about this next week. I think for this to be a commercial success you/we need to provide three things to a client

1. the web site
2. consulting to show them how to use it and benefit from it
3. tech support to keep working with them over time

As you think about marketing this to others, I'd like to develop an agreement and fee

structure that a) covers your expenses and gives you a profit for doing #1 and #3. Provides a fee to T/MC and Steve Roussos to help people with #2. Because the idea originates from T/MC I'd like to retain some on-going income from this if it becomes a commercial success.

Dan

Dan,

I will make this website commercial and so that T/MC can pay only small amount \$50 each month. I will add/complete all the features listed to you earlier.

Commercial meaning - multiple non-profit agency will use the website. T/MC will get their own subdomain like <http://tmc.findamentor.com>

Will this be acceptable to you? Let me know.

Ganesh

Subject: OHATS Effort and proposed Price info

Dan,

I have attached 2 files.

- 1) OHATS - Basic Price Info.PDF
--> This contains information about the feature that we have completed till now. Pricing is just FYI.
- 2) OHATS - Advanced Features (Saturday Discussion)
--> This include the proposed advance feature and the price to build those feature.

I saw very good amount of information available to highlight the work done by T/MC.

For e.g. http://cmapspublic.ihmc.us/servlet/SBReadResourceServlet?rid=1178301962705_378512451_14531&partName=htmltext

This link have very good information - But for a normal user to access it, we need bigger screen or multiple clicks and it is missing a quick search feature to get access to the information that we want.

This could be presented in different way -

Let me know your comments

Ganesh

Thank you for your business!

Welcome to OHATS T/MC

Since September 2000, the T/MC has been using OHATS (Organizational History and Accomplishments Tracking System). OHATS is an Internet-based system for organizations to easily record and report important events, actions and lessons that take place during the day-to-day work to improve the conditions necessary for all youth to succeed. Read this pdf to see how we have intended to summarize and share the information in the OHATS T/MC.

http://www.tutormentorexchange.net/OHATS/Reports/TMC_OHATS_Report_Sep-00_thru_Mar-02.pdf

[more]

This pie chart represents the type of events facilitated by T/MC. An event may be grouped in more than one category. The percentage representation of different event types with respect to the total events are marked.
