

In your mind, will the home page that you are creating be a replacement for this? Or will it be a link off of this? What we are creating should be integrated with what we already have.

Home of Interactive map (Page 1)

Full screen interactive map, showing Chicago region, with boundaries, poverty zones, and poor schools already turned on. Tabs would be as shown

<http://www.tutormentorprogramlocator.net/programlocator/default.asp>

. Add

7-9 faith groups

Interactive map org chart: page 3

FORMAT: each of the preformatted boxes should have a map view representing the types of maps in that page. When you click on the box, you go to a new page, where the same search features of the HOME page are available, but the boundaries shown on the map, and available as choices, are those that reflect that particular category.
